

## HSCRC CLIENT

“On an every day-to-day basis we are presented with the option to strive or to hide. I’ve been faced with the opportunity to strive and being housed at ColumbiaCare Services has been more than welcoming of all walks of life. With that being said, it is not expected of you to hide nor to strive but to only stay alive. It is certain I’ve developed a large sense of security due to the 2nd chance I’ve been given. It’s made me full and focused. And with that said, thank you.”

### – Halsey Street CRC Client

A client was recently referred to Halsey Street Crisis Resolution Center from a local community provider, thus avoiding an ER visit and possible inpatient care. The client was experiencing severe depression with suicidal ideations along with a recent history of substance abuse accompanied by homelessness. After the client’s stay at HSCRC, they are now experiencing hope and recovery, medication stability, engaged with community supports, and are moving into a supported living environment. This client’s success is because of their inner strength and resiliency, which they were able to access because of the excellent care and professional and friendly atmosphere that HSCRC provides on a daily basis.
